O-۰۰۲ Non-invasive prenatal testing (NIPT) - state of the art

O-۰۲۷ Spent Blastocyst Media and Blastocoel Fluid are not reliable DNA sources for preimplantation genetic diagnosis of aneuploidies and monogenic disorders

O-۰۲۸ Development and application of a novel strategy to explore blastocoel fluid and spent culture media as a source of embryonic DNA

O-۰۲۹ Non-Invasive PGS reveals the existence of complementary aneuploidy between DNA obtained from trophectoderm biopsy versus DNA in spent culture medium in the same embryo

O-۰۳۰ Superiority of array Comparative Genome Hybridization (aCGH) over Next Generation Sequencing (NGS) for PGD for reciprocal translocations
